# Feature Descriptors / HOG

Inceptez

# What is a Feature Descriptor?

#### **Most Popular Feature Descriptors**

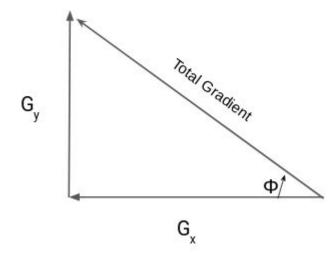

- 1. **HOG**: Histogram of Oriented Gradients
- 2. **SIFT**: Scale Invariant Feature Transform
- 3. **SURF**: Speeded-Up Robust Feature

#### What is HOGs?

- 1. Gradient and Orientation
- 2. 'localized' portions
- 3. Histogram

#### **Steps to calculate Gradients**

- 1. Preprocess the Data (64 x 128)
- 2. Calculating Gradients (direction x and y)
- 3. Calculate the Magnitude and Orientation

## **Methods of Generating Histograms**

121	121 10		96	125	
48	152	68	125	111	
145	78	85	89	65	
154	214	56	200	66	
214 87		45	102	45	

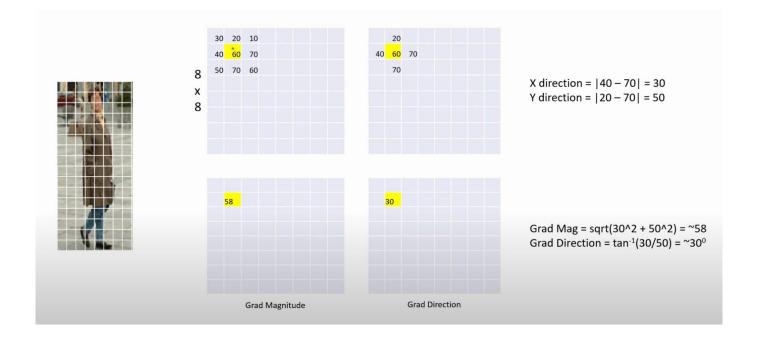

Magnitude		1							
Bin	0	20	40	60	80	100	120	140	160

### **Methods of Generating Histograms**

121	121 10		96	125	
48	152	68	125	111	
145	78	85	89	65	
154	214	56	200	66	
214	87	45	102	45	

Magnitude		1							
Bin	0	20	40	60	80	100	120	140	160
